

GPS/CAD Converter

Product Description

GPS / CAD Converter is a program for GPS and AutoCAD or IntelliCAD data exchanging. Data from GPS could also be exported to text file, Excel, ESRI Shape, GPX file.

Features and Benefits

- Download and upload selected points from / to GPS / AutoCAD or IntelliCAD.
- Download and upload Tracks and Routes from / to GPS receiver.
- Built in coordinate systems, ellipsoids and geodetic datums.
- Create new coordinate systems (including ellipsoids and geodetic datums).
- Transform between coordinate systems.
- Calculate distance and azimuth from active point.
- Magellan and Garmin GPS support.
- Insert new points, edit and delete selected points.
- Import and export from / to text file, Excel, ESRI Shape, GPX file.
- Organize GPS symbols.

What's new in GPS/CAD Converter

- Maintenance of Windows Vista.
- Additional functions of export: (Export to KML, KMZ, Excel, DXF).
- Additional functions of import: (Import from KML, KMZ, Excel, DXF).
- Released function to view selected points in these platforms: (Virtual Earth, Yahoo Maps, Google, Earth, Google Maps).
- Released function to view the route between selected points in these platforms: (Virtual Earth, Google Maps).
