Autodesk® Maya®

Object will not render with software
mental ray

Product	Maya	Topic	Rendering
Version	7.0	Platform	
Created	May 11, 2006	Modified	May 11, 2006
Author	Tarquin Lougheide	ID	243928

Issue

I was given a file and when I try to render it into view as a test render, the object will not render. However, when I try to render in mental ray, it will work fine.

Workaround

After further investigation, it was learned that the user had scaled the camera. This changed the Depth attributes position although it looked correct in the Viewport.
